

Second edition of

A glance at the Wild Flowers of Iranian Mountains

by Jalil Noroozi

With 372 pages, 513 colour photos covering 266 plant species, colour distribution maps, bilingual (English/Farsi), hardcover

Almost half of the presented species are monocots (Alliaceae, Amaryllidaceae, Araceae, Asphodeliaceae, Colchicaceae, Hyacinthaceae, Iridaceae, Liliaceae and Orchidaceae), and the other half are dicots (Berberidaceae, Campanulaceae, Geraniaceae, Paeoniaceae, Papaveraceae, Primulaceae, Punicaceae, Ranunculaceae, Rosaceae and Violaceae). The species are briefly described. General distribution, distribution in Iran, habitat, altitudinal range, flowering time and distribution map are given for each species. All photos have been taken in the wild. In the second edition, near to 100 more species are presented comparing to the first edition.
